

## What is Twitch?

Twitch is a live streaming platform that primarily focuses on video game streaming, but has expanded to include other forms of entertainment such as music, art, and talk shows. It was launched in 2011 and has since become one of the most popular live streaming services on the internet, with millions of users tuning in every day to watch their favorite streamers play games, create content, and interact with their communities in real-time.

Twitch allows users to create channels where they can broadcast their live streams, and viewers can interact with the streamer through a chat feature. The platform also offers various tools for streamers, including ways to monetize their content through donations, subscriptions, and advertising. Twitch has a large and active community of creators and viewers, and is a popular platform for esports competitions and events.

## Games/Categories

**Just Chatting:** A category on Twitch that allows streamers to interact with their audience through live conversations and activities that don't necessarily involve gaming. This category can include a wide variety of content, such as talk shows, interviews, podcasts, cooking streams, or any other type of content that involves the streamer engaging with their audience through conversation.

\*The "Just Chatting" category has become increasingly popular on Twitch, and many streamers use it as a way to connect with their viewers on a more personal level. It can be a great way to build a community and foster engagement with your audience outside of the context of a specific game or activity. Additionally, the "Just Chatting" category can provide a more casual and relaxed environment for streamers to interact with their viewers, which can be a refreshing break from the intensity of competitive gaming streams.

**League of Legends:** League of Legends (LoL) is a popular multiplayer online battle arena (MOBA) game developed by Riot Games. It was first released in 2009 and

has since become one of the most popular online games in the world. In League of Legends, players control a champion with unique abilities and battle against a team of enemy champions, either in a 5v5 format on a single map, or in various other game modes. The objective of the game is to destroy the enemy team's base while defending your own.

**Fortnite:** Fortnite is a popular online multiplayer game developed by Epic Games. It was first released in 2017 and has since become one of the most popular games in the world, particularly among younger audiences. In Fortnite, players control a character and fight against other players or teams in a battle royale-style game mode.

**Grand Theft Auto V:** GTA V is a popular game on Twitch, with many streamers and viewers regularly tuning in to watch and participate in gameplay. One of the main draws of watching GTA V on Twitch is the opportunity to see skilled players navigate the game's complex and dynamic open world. This can include completing missions, engaging in heists, or simply exploring the city and causing mayhem. Many streamers also incorporate role-playing elements into their gameplay, which can add a layer of depth and immersion to the experience.

**Counter-strike: Global Offensive:** (CS:GO) is a popular multiplayer first-person shooter game where players are divided into two teams, the Terrorists and the Counter-Terrorists, and must complete objectives specific to each map. CS:GO is known for its competitive gameplay, which involves tactical decision-making, precise aiming, and teamwork.

**Dota 2:** Short for Defense of the Ancients 2, this game is a popular multiplayer online battle arena (MOBA) game where players control a hero character with unique abilities and work together with a team of other players to destroy the enemy team's base while defending their own.

**Valorant:** Valorant is a popular multiplayer tactical first-person shooter game where players are divided into two teams, the Attackers and the Defenders, and must compete in a series of rounds to plant or defuse a bomb, or to eliminate the enemy team.

**Minecraft:** Minecraft is a popular sandbox video game developed by Mojang Studios. It was first released in 2011 and has since become one of the best-selling

video games of all time. In Minecraft, players are placed in a randomly generated 3D world, which they can explore and manipulate as they see fit. The game is open-ended and allows players to build and create structures using various types of blocks. These structures can range from simple homes to complex machines and massive cities.

**Call of Duty: Warzone:** This is a free-to-play battle royale video game developed by Infinity Ward and Raven Software, and published by Activision. It was released in 2020 and is part of the Call of Duty franchise. In Warzone, players are dropped onto a large map and must fight to be the last player or team standing. Players can choose to play in solo, duo, or squad modes, and must use their skills and strategy to outlast their opponents.

**Hearthstone:** Hearthstone is a popular collectible card game developed and published by Blizzard Entertainment. It was released in 2014 and has since become one of the most popular online card games in the world. In Hearthstone, players build decks of cards representing various characters, spells, and abilities from the Warcraft universe, and use them to battle against other players. The game is played on a virtual board, where players take turns playing cards and trying to reduce their opponent's health to zero.
